WASHINGTON, D. C. 20560

Typescript of first three pages of field notebook

The peninsula of Yucatan is dotted with the monumental ruins of a dead cult, it still survives with the descendants of the builders of those memorials, an athletic barefoot race docile and intelligent and simple still Indians.

History is asked to tell us what was the course of development up to the closing episode of this cult and what we query not in vain as to what has followed to date.

The ~~---BYE~~ type is ^{not} a doubtful one. It is today well marked and the individual of Spanish blood can be selected with almost as much ease as he who has negro blood in the U. S.

In Figure short (5ft.) strong bodied arms and legs short and strongly knit, tapering, feet, head etc.

Habits, alert active industrious small because of small environment, loyal clean, cheerful.

Friday Dec 20th '94

On train to St Augustine,
Got up as the train moved out
of Savannah. Struck at once the
low lands with pines & swamps
& cypress bogs, - a waste - a most
desolating region ~~marked~~^{crossed} by
muddy rivers. No decent dwelling
between Savannah & Jacksonville.

Train late & train to St Augustine
missed. all read. Handled a
telegram ^{from Millsbaugh}, saying boat was at
Jacksonville - got off there. Great
relief. On board boat by
one o'clock & by three settled
down for the voyage.

Armed Williams & Morquand returned
from St Augustine at night.

Dec 21st 94 Saturday

Got up early to find the "Stuna"
already in motion and leaving
Jacksonville behind we were on
our way down the St Johns - a broad
lake like body of water bordered by
gray green forest with but little
elevation save a few low knoll
like elevations. We passed the great
Square tower on the right and
an occasional cluster of houses

The water coffee colored
few boats

Soon we saw the white sand
dunes of the outlet ahead and the
village of Mayville with its light
houses and clusters of houses with
clumps of ^{dark} trees scattered over the
great heaps of white sand

Dec 21st

Saturday

2

dropping the pilot we set our
prow seaward through the angry
looking line of breakers, which
we passed with the rather
unpleasant sensation of striking
the bar three times in succession
as the troughs let us down to
unwalled depths.

In a few minutes we were
looking back at the white beaches
and turning to the south began
the long task of coasting the
East Coast of Florida. The
storm was over but there was
a fine roll and by late afternoon
Dr. McIlspagh & myself were feeling
a touch of the mal de mer,

Dec 23rd 94 Sunday 1

It was a superb sail down the shore
of Florida - cleaving the ~~seethy~~ intensely blue
sea ~~which~~ bordered on the right by
the long even line of beach. Just at
the margin of the blue water was a fringe
of playing surf then the even band of
beach with a line of dark seaweed then
a bank rising some 15 or 20 ft marked
above by the solid line of vegetation, magnolia
trees covered here ~~up~~ oak in ^{heavy} masses with
here and there a few coconut palm
and the round headed palmetto. These
in fine perspective fade off ^{between} into the
gray haze and the blue sea at the
north mouth. Soft air, gray over sky.
In the midst of this strip of land
well lighted by the morning sun are
indications of the presence of man, there

are cottages hardly hidden in
 the foliage, there are ^{the} larger
 masses of hotels and at Lake
 worth a great massive yellow
 building ^{Royal Prussian} ~~mass~~ of ~~the~~ ^{the} ~~herzogin~~
 and windmills break the nearly
 looking like great poles.

Approaching Havana

Christmas but a glorious
summer day is overhead and
a warm blue sea beneath
as we approach the high
point with its castellated
buildings that hide the
harbor & city -

Dec 24

Promontory with the tower

Tomorrow is Christmas and

today is as fine a summer day

as we could wish

Dec 24th approaching Havana
Morning dawns on us in the
Florida Straits almost midway
between the Florida Keys &
Cuba, our direction being oblique
as if cast off on a large wheel
curve from the rounded shore
line of southern Florida, we
are in the middle of the
gulf stream & the water is
deep & blue & gives us a
slight roll now & then. The
sky is fair with small fleecy
clouds clustered about.

At about ten the long
back bone of the Cuban ridge began

sec 24
To appear at the left - and
at clear the castle on the
point outside of Haian. was
a weed,

The Island
presents a pretty even ^{front} ridge
not high in front but with

promise of higher ~~lands~~ a little
back. There are forests &

fields on the slope and houses
here and there along the shore
at glimpses of beach & brakas
can be heard on an approach
& run obliquely down the shore,

There are also buildings on
the fertile hills & extensive
structure, perhaps fortresses on the

Merida Dec 29th

A most interesting day spent in Merida. Left the dock with Amor, Prof Mangum & Nullofange by the little launch, landed for the first time in Yucatan, passed along the long wharf over the sand beach to the wharf house thence past the light house to the R.R. Station. The train of American made cars was ready and we passed out through the village with its primitive thatched houses across the swampy belt to the rocky waste covered with low trees & bushes where many flowers, mainly Anvolvulus, were seen. Presently the sisal, yucca fields followed

Menda

and the haciendas nestled among
clusters of ^{cocconut} palms and other rich trees.
In Menda the features of greatest
interest are the town with its narrow
rather regular streets, its Spanish houses,
the glimpses of interiors, the grated
windows & balconies, the markets with
the interesting people, the fruits &
native products sold & the arched
alcoves with shades of matting
& rags protecting the people from
the sun. Above all the people them-
selves with their white garments &
loads of marketing.

It was Sunday morning and all

Merida 3

was a little dressed up and
though the markets were open
there was little else going on and
the people were in a measure
at leisure. All were quiet &
peaceable & we wandered about often
in crowded places sketching & photo-
graphing.

Saw back of the market & jail
by the old church which once re-
tained an ancient archway a
great pit dug into the top of
the massive mound on which
the jail & church and a great ruined
wall are built. The mass penetrated
seems however to be of Spanish con-

Struckan although ^{Merida 4} Thompson says that
the main body is aboriginal
visited the cathedral and the
most interesting antiquity of Merida
the memorial ^{Chich} ~~house~~ front dedicated

Progreso

From Merida the rocky surface slopes down gradually to the sea level at Progreso. Indeed inside of Progreso there is a belt of ^{partially} submerged land enclosed by the heavy bar on which the city is built. There appears to be no outcrop of the limestone on the Gulf front save a low point hardly above tide near the ~~off~~ Eastern end of the town. The line of dunes rises some ^{10 or} 15 feet above mean tide.

Back of the town on the margin of the salt swamp and near the point cut by the R.R. is a considerable mound apparently the main body of the

hidden of a compact way a village
of prehistoric date. It is said
that formerly there were stone walls
visible in places indicating permanent
inhabitation, but now the man is
pure refuse - dark earth filled
with countless broken sea shells,
the refuse of food supply, and
potsherds and stone implements. The
man is a low rounded mound
of irregular outline 200 to three
hundred ft in diameter, and as
shown by a section recently made
~~by~~ in filling up a low spot is
say a more feet high in the
centre. Many fragments of vases

FIELD COLUMBIAN MUSEUM

of the preceding ^{progress} 3 Guano types
were picked and ~~stone~~ meal
stones, sledge hammers, stone hammers
and occasional flaked stone are
picked up. On the west side of
the R.R. is a similar mound
occupied by houses. It is stated
by Mr. Thompson that other like
mounds occur further west and
it is not unlikely that the
whole coast is strewed by like
midden piles of the Gulf coast
fishermen of the olden time.
